

## ***PRIVATE DATA SECURITY ON SMARTPHONES***

***Note of on how to increase the security on smartphones and keep your private data safe:***

- *Ensure that operating system is updated*
- *Also, applications should be cleaned up on a regular basis.*
- *Make sure applications are locked up with passwords.*
- *Avoid using public Wi-Fi*
- *Beware of links and messages not familiar.*
- *Erase/flash or clean up a lost or stolen phone.*
- *Be very careful about your digits or information.*
